SPECIAL NOTES

Labor Service applies when 5 or more power drops are needed. New York City Code requires that no electrical equipment or apparatus can be connected unless it conforms to its electric code. Upon request, PIER SIXTY will supply copy of NYC Electric Code. PIER SIXTY will supply qualified electricians to correct any infractions at prevailing costs. Wiring regulations based on the Electric Code of the City of New York.

All electrical apparatuses and splices must be installed in a metal enclosure to prevent emission of sparks.

All metal raceways, metal lighting fixtures and metal housing of electrically powered equipment shall be grounded.

All extension cables shall be 3 wire SJ cord or other approved type and not more than 10ft long. One of the wires with green colored insulation is to be used as a ground. The cable must be large enough for the load and have a grounded male plug.

Flexible cords and cables less than #14 gauge wire shall not be permitted. The use of lamp cord, cube tabs or similar devices are not permitted. Plug in strips shall be mounted not less than 2ft. 6 inches above the floor and shall be securely fastened.

Labor not included for special power equipment. Labor will be charged at prevailing rates on a half-hour basis.

*PIER SIXTY will not be responsible for any voltage fluctuations or power failures beyond our control.
